

User Guide for RAG-Powered AI Assistant with LLaMA3 and GPT-2 Interface

Welcome to the new RAG-enhanced chatbot interface! This guide will help you navigate the features available to you.

Interface Overview

The chatbot interface consists of two main tabs: **Chat** and **Conversation History**.

1. Chat Tab

In the **Chat** tab, you can interact with the chatbot by following these steps:

- **Model Selection:** Select Model is a dropdown menu that allows you to select the model you wish to use. You can choose from the following options:
 - LLaMA with RAG
 - GPT-2 with RAG
 - LLaMA
 - GPT-2
- **Interacting with the Model:** After selecting your preferred model, enter your prompt or question in the input field and press the "Submit" button to send your message. The chatbot will respond based on the selected model's capabilities.

2. Conversation History Tab

In the **Conversation History** tab, you can view previous interactions with the chatbot:

- **Previous Chats:** displays a list of your past conversations, including the prompts you used and the corresponding responses from the model.
- **Response Time:** Next to each entry, you can see the response time for each interaction, helping you understand the performance of the different models over time.

Conclusion

You are now ready to explore the RAG features in your chatbot! Feel free to switch between models and review your conversation history to enhance your experience. Enjoy chatting!
